Series 2000 Up-and-Over Doors

Product description

General aspects

Series 2000 doors are available with either canopy, retractable or retractable plus gear and an optional factory fitted steel frame or supplied for fitting to a timber sub-frame.

For Series 2000 and side doors to align, further details are required.

Door leaf

Steel leaf chassis with steel infill, boarded timber infill, infill or prepared for infill on site. Door leaf reinforced with 2 steel profiles

Single and double doors with lateral UPVC weather seal as trap guard and sound absorber, fitted to the bottom part of frame and top of door

Styles with timber infill:

Styles 2005, 2007, 2008, 2009 & 2014:

Built on a plywood backing and supplied with a natural / light oak base-coat treatment.

Styles 2009, 2019, 2013, 2020, 2114, 2019, 2119, 2010, 2110, 2121, & 2122:

Using solid red cedar, main boarding formed using ex 100 x 12 mm boards fixed from the inside (not visible from the outside), also supplied with a base-coat treatment.

Style 2011 Open-for-infill:

Prepared for infill in the frame or overlapping the frame.

Infill weight:

Single doors min. 6 kg/m2

max. 10 kg/m2

Double doors

min. 6 kg/m2 max. 10 kg/m2 standard

View of infill in the frame:

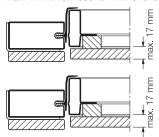

Single doors

Double doors

Max. infill thickness for infill overlapping the frame:

for Single doors:

- 16 mm infill thickness
- + 1 mm gap
- = 17 mm infill thickness

for Double doors:

16 mm infill thickness

- + 1 mm gap
- = 17 mm infill thickness

Counterbalance

Canopy doors - Single torsion spring shaft fixed to the head frame with cable and rollers running in vertical tracks on the inside frame legs. Spring and vertical tracks incorporate spring and cable break safety system conforming to BS EN 12604.

Retractable doors - Multiple spring safety system: tight coils eliminate the risk of finger trap also conforming to BS EN 12604.

Retractable Plus doors - as retractable doors but with an increased clear drive through height (see data sheet for further information).

Surface protection

Styles with steel infills:

Door leaf made of galvanised material, powder-coated in

- Traffic white, based on RAL 9016,
- Terra brown, based on RAL 8028,

Steel frame powder-coated in the same colour as door.

Styles with timber infills:

Door leaf made of galvanised steel, with powder-coated pre-finished in Terra brown, based on RAL 8028.

All timber doors have natural / light oak base-coat as standard.

Fittings and locking

Round plastic handle on the outside, plastic 'rotary disc' on the inside. Special lock with multi-point locking, with profile half cylinder and release button on the inside, 2-point locking by automatic UPVC-latch (adjustable) 4-point locking option also available.

Standard

Single doors pre-assembled UPVC rollers and UPVC bushes in all door bearings and buffer stop.

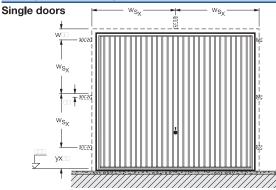

Double doors track rollers with ball-bearing.

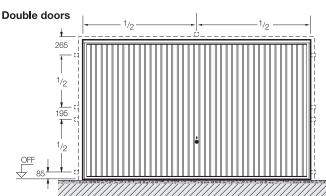

Delivery

Single doors pre-assembled, 1 unit.

Double doors 3 units: door leaf, frame pack and accessories pack.

Arrangement of fitting anchors

Dimension of door leaf Single doors

BR width - 58 mm BR height - 10 mm

Double doors

BR width - 58 mm BR height - 10 mm

Steel frame

Single doors: Optional steel box section frame with horizontal tracks, pivot arms etc all pre-fitted.

Double doors: Optional steel box section frame with horizontal tracks, pivot arms etc all pre-fitted.

• Note:

Series 2000 Doors do not include a bottom threshold rail as standard.

Doors can also be fitted to a 70 x 70mm nominal goal post frame (minimum 55mm wide for canopy doors).

The door leaf and optional box section steel frame are made of galvanised material that is polyester powder coated on both sides.

This finish is extremely durable and the standard colour is Traffic white RAL 9016.

Other colours are available listed in optional extras below.

To help maintain the aesthetic appearance of your door and prevent the build up of dirt, salt and other corrosive substances the door should be washed with a mild soap-based solution on a regular basis.

If the door is located near the coast it is important that the door panel and frame should be washed at least every 2 months.

We also suggest that all other components are brushed down on a regular basis to prevent the build up of dirt and dust etc.

The window frames on the Georgian and Ilkley doors are UPVC and white as standard.

These frames are a 2-part construction with the window material sandwiched between and frames screwed together from the back for security.

The finish of the Decograin doors is a synthetic foil-coated timber design outside (inside primer white).

The leaf frame and fixing frame is a matching powder coating.

For further choice of exciting door designs in steel, traditional or contemporary, with a vast range of sizes and increased range of colours, ask your garage door specialist

Optional extras for Steel Doors		Price
75mm Steel fixing frame for either canopy or retractable geared single doors. Factory	fitted	168

Our timber garage doors are constructed as an infill to fit into the Open-for-Infill Up-and-Over door frame, this gives the doors their rigid and durable construction.

The styles Measham, Jacobean, Tudor and Rutland are cedar facings glued and fixed to exterior quality plywood.

The solid cedar doors are 12mm tongue and groove boards constructed as an infill.

Cedar is organically grown with natural colour and grain variations; this is a feature of cedar.

We make every effort to harmonise the effect where possible, by hand matching the component parts used in construction.

Please note a uniform overall grain pattern cannot be guaranteed.

Protection (Basecoat)

All our timber doors are supplied with a dip immersion coat of Remmers Induline GW306 base stain primer 006 Light Oak; this coating is for temporary protection only.

If purchased in this temporary finish, please ensure that a full specification of finishing coats are applied immediately before or after installation to all exposed surfaces - inside as well as outside - with a Remmers or similar finishing coat system.

A fully finished option is available, please see options below.

For further choice of exciting door designs, traditional or contemporary in Nordic Pine and Hemlock, with a vast range of sizes, ask your garage door specialist about the N 80 Up-and-Over garage doors available to special order.

Optional extras for timber doors	Price

Sectional doors LPU 42 - steel

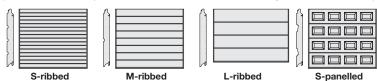

Product description

Applies to all registered LPU 42/67 unmodified sectional garage doors, using a Hörmann operator and fitted behind the opening. To register your door, email us at info@hormann.co.uk.

Views

(The illustrations correspond to size 2500 × 2125 mm. Deviations may occur with other sizes.)

General

Sectional garage doors for private purposes. Prepared for Hörmann garage door operators, 10 door cycles per day in accordance with the guarantee conditions.

With finger trap protection on outside and inside.

Door sections made of double-skinned steel sections, 42 mm thick, made of hotgalvanized sheet steel, PU-foamed.

- S-ribbed Woodgrain-embossed on exterior
- M-ribbed Woodgrain-embossed, Slategrain-embossed, Sandgrain, Silkgrain or *Decograin* on exterior
- L-ribbed Woodgrain-embossed, Slategrain-embossed, Sandgrain, Planar, Silkgrain, Decograin or Duragrain on exterior
- S-panelled Woodgrain-embossed or Decograin on exterior

Thermal insulation value:

Section 42 mm

Fitted door 42 mm (without ThermoFrame) *

Fitted door 42 mm (with ThermoFrame)

Without glazing, door size 5000 × 2250 mm

Versions:

Any door height divided in even door sections (except intermediate heights).

- S- or M-ribbed:
 - horizontal increments evenly spaced in height
- L-ribbed
- S-panelled:

panel arrangement evenly spaced in width

The number and division of the panels in an LPU 42 door may deviate from an LPU 42 door with wicket door!

Bottom door section with bottom seal as standard.

Note on door leaf reinforcement:

Solar radiation may result in deflection of the door elements and foam break. To reduce the possibility of section deflection caused by sun exposure, all doors from LZ>5000 mm are equipped at the factory with the door leaf reinforcement set

From LZ > 4500 mm, the following colours and decors are equipped at the factory with the door leaf reinforcement set.

RAL colours	S		
RAL 3007	Black red	RAL 6022	Olive drab
RAL 5003	Sapphire blue	RAL 7016	Anthracite grey
RAL 5004	Black blue	RAL 7021	Black grey
RAL 5011	Steel blue	RAL 7043	Traffic grey
RAL 5013	Cobalt blue	RAL 8014	Sepia brown
RAL 5020	Ocean blue	RAL 8016	Mahogany brown
RAL 5022	Night blue	RAL 8017	Chocolate brown
RAL 6004	Blue green	RAL 8019	Grey brown
RAL 6005	Moss green	RAL 8022	Black brown
RAL 6007	Bottle green	RAL 8028	Terra brown
RAL 6008	Brown green	RAL 9004	Signal black
RAL 6009	Fir green	RAL 9005	Jet black
RAL 6012	Black green	RAL 9011	Graphite black
RAL 6015	Black olive	RAL 9017	Traffic black
0-1011	700		

- Colour CH 703
- Noir 2100 Sablé (Anthracite metallic)
- Planar CH 7016 Matt deluxe Anthracite grey, CH 8028 Matt deluxe Terra brown and CH 703 Matt deluxe Anthracite metallic
- Decograin decors Dark Oak, Night Oak, Rosewood and Titan Metallic CH 703
- Duragrain decors Sapeli, Terra Walnut, Mocca, Grigio scuro, Rusty Steel, Burned Oak, Cherry, Rusty Oak, Noce Sorrento Balsamico

Colours and decors that have not been listed may be ordered with the door leaf reinforcement set as optional equipment

In case of any doubt, we recommend ordering the reinforcement as an option for doors under thermal loads not equipped with a door leaf reinforcement at the factory.

Door leaf reinforcements limit section deflection, but do not prevent it completely.

The use of a SupraMatic is recommended for doors with operator and door leaf reinforcements.

Frame

U = 0.5 W/(m²·K)

U = 1.4 W/(m²·K)

U = 1.2 W/(m²·K)

Frame

with trap guard, made of hot-galvanized sheet steel, Woodgrain-embossed. with side seal and plastic frame shoe.

Standard version: Frame with polyester-primer coating in Traffic white, based on RAL 9016; galvanized tracks, suspensions and connection rail. Premium version: Frame, tracks, suspensions and connection rail in Grey white based on RAL 9002

Fascia panel, single-skinned, with seal to make up for insufficient headroom up to 100 mm

- in Woodgrain-embossed with Woodgrain doors.
- In smooth for Slategrain-embossed, Sandgrain, Planar, Silkgrain and Decograin.

Fascia panel in door colour for doors in RAL 9016, Color, Color Matt deluxe, RAL to choose and Noir 2100 Sablé.

- in Decograin (with plastic film coating, for possible decors see page 15).
- in Duragrain as standard in Woodgrain RAL 9016 (optionally available in a colour matching the decor).
- Frame covering, single-skinned (optional for a surcharge) required for fitting in the reveal in the versions:
 - in Woodgrain-embossed, Sandgrain, Planar, Silkgrain or Decograin
 - In smooth for Slategrain-embossed or Duragrain

For possible surface coating (colours/decors), see product description on page 15. Please state desired colour/decor on order!

Counterbalance

- Tension spring assembly:
 - with lateral integral double tension springs with 2 cables on each side
 - up to door width 3250 mm and door height 2625 mm,
 - up to door width 3500 mm and door height 2375 mm.
 - up to door width 4000 mm and door height 2250 mm

Torsion spring assembly:
Torsion spring assembly with cable drums and approved spring safety device as well as integral lateral cables

- from door width 3251 mm and door height 2625 mm,
- from door width 3501 mm and door height 2375 mm,
- from door width 4001 mm and door height 2250 mm

Tension springs and torsion springs are galvanized.

Sectional doors LPU 42 - steel

Applies to all registered LPU 42/67 unmodified sectional garage doors,

Product description

Fittings and closing devices

As standard without door handle set and lock. The door handle sets to be ordered separately are supplied including a template for an on-site lock knock-out. A factory lock knock-out will result in a longer delivery time and must be ordered

If a sectional door without door handle set and lock is equipped with an operator, an emergency release is required if there is no second entrance!

Fitting parts

As standard, the fitting parts are galvanized.

Premium version

The following components are supplied in RAL 9002:

- Door leaf fittings
- Side frames
- Horizontal tracks incl. connection rail and double radius
- Defined accessory parts

Version with break-in-resistant fitting RC 2

Break-in-resistant sectional garage door LPU 42 according to DIN/TS 18194 RC 2 with and without wicket door.

- Only for doors with operator!
- Fitting behind the reveal only!
- For track applications Z, N and L only!
- 2nd entrance to the garage required!
- Premium version possible.

Surface coating of door leaf

Woodgrain, Slategrain and Silkgrain version with polyester-primer coating on both sides

Interior:Grey white, based on RAL 9002

Exterior:

Traffic white as standard, based on RAL 9016

Color, preferred colours based on the RAL CLASSIC colour chart

RAL 1015 Light ivory RAL 7035 Light grey RAL 6005 Moss green RAL 7039 Quartz grev RAL 6009 Fir green RAI 7040 Window grey RAL 7012 Basalt grey RAL 8028 Terra brown RAL 7015 Slate grey **BAL 9005** Jet black RAL 7016 Anthracite grey RAL 9006 White aluminium RAL 7030 Stone grey RAL 9007 Grey aluminium Hörmann colour CH 703 (Anthracite metallic)

Noir 2100 Sablé

RAL to choose*, based on the RAL CLASSIC colour chart

Special colours on request

(other colour systems, such as NCS or DB* colours and colour 8077)

Not available: RAL colours 4006, 4007 and 9021 as well as pearl-effect colours and fluorescent colours

In wicket door version in Silkgrain, the following RAL and DB colours are not available: DB: 701, 702

RAL: 3007, 5004, 7021, 8022, 9004, 9011, 9017, 8077

Version with exterior polyester final coating. For doors with Woodgrain, Slategrain or Silkgrain surface finish (clear varnish)

Final coating:

Increase of weather protection and prevention of chalking. No increase in corrosion protection in the area of cutting edges.

Final coating "Anti-graffiti":

Simple removal of graffiti by using Graffitix from the manufacturer Matecra. Available from specialised retailers. Increase of weather protection and prevention of chalking.

No increase in corrosion protection in the area of cutting edges.

The polyester final coating gives the coated surface a more matt appearance. A direct combination of primed and final coated products should be avoided due to the varying gloss levels!

Sandgrain version with polyester-primer coating on both sides

Interior:

Grey white, based on RAL 9002

- Traffic white as standard, based on RAL 9016
- Color, preferred colours based on the RAL CLASSIC colour chart

RAL 7016 Anthracite grey

Other colours and RAL to choose are not possible!

using a Hörmann operator and fitted behind the opening. To register your door, email us at info@hormann.co.uk. Planar version with polyester-primer coating on both sides

 - Decograin version fitting in the opening: Plastic film coating in colour of door curtain.
- Lintel and curtain cover made of sheet steel, coated in door curtain colour.
 - Decopaint / Decograin version:
 - Colours matching the Decopaint / Decograin surface finish.
- Side cladding made of sheet steel, coating in the door curtain colour.
- Decopaint / Decograin version:
- Colours matching the Decopaint / Decograin surface finish.

Door curtain

Rolled aluminium profile foamed with polyurethane rigid foam with integrated wind locks, profile height 77 mm. Coloured versions with two-layer coil coating with a paint system based on a high-quality polyurethane coated with polyamide

All Hörmann roller garage doors correspond to their technical properties and use state-of-the-art paint systems. Pressure marks and abrasive wear are designrelated and cannot be avoided. They do not impair the function and the durability of the roller garage door.

Surface coating

Version in standard colours

Interior and exterior of door curtain: Standard colours based on the RAL colour chart:

RAL 9016 Traffic white **RAL 7016** Anthracite grey RAL 1015 Light ivory **RAL** 7035 Light grey RAL 3003 Ruby red **RAL 8028** Terra brown RAL 3004 Purple red RAI 9001 Cream RAL 5011 Steel blue RAI 9005 Jet black RAL 6005 Moss green **RAL 9006** White aluminium RAL 7015 Slate grey RAL 9007 Grey aluminium

- Chartwell Green
- Noir 2100 Sablé (Anthracite metallic) at a surcharge

Dark colours should not be used for doors that are exposed to the sun.

Our garage doors RollMatic are made of different materials. Particularly in the case of darker colours based on RAL 7015, RAL 7035, RAL 7016, RAL 8028, RAL 9005, RAL 9006 or RAL 9007 as well as the colour Noir 2100 Sablé, a differentiated colour perception between the sections and other coloured components of the door may occur depending on the lighting on-site. Such colour deviations do not warrant a complaint.

Decopaint version with paint in timber design look

Interior and exterior of door curtain:

- Golden Oak medium brown, yellow-gold surface with vibrant oak character
- Rosewood reddish-brown stripey timber design

Decograin version with plastic film coating with timber design (not available for external roller garage doors)

Door curtain, exterior:

- Coated with UV-resistant plastic film with timber design with embossed grain for authentic timber character
 - Golden Oak medium brown, vellow-gold surface with vibrant oak character
 - Rosewood reddish-brown stripey timber design

Door curtain, interior:

Terra brown coating based on RAL 8028

Counterbalance

Tension spring assembly with lateral integral double tension springs. Cladding of internal roller garage door with transparent plastic and with aluminium profiles with integrated window cut-outs for external roller garage doors. Transmission of forces

Manually operated version (not possible with external roller garage door)

Door operated via chain hoist and interior/exterior handle

Fittings and closing devices

Lockable bottom profile with two-point locking for manually operated doors.

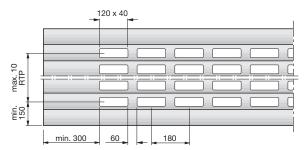

Chamfered bottom weather seal (optional, not available for manual

Optional bottom profile to compensate for uneven floors (up to 300 mm height difference). Standard colour Jet black RAL 9005. Optional coating available in door curtain colour (with the exception of Decopaint and Decograin).

Delivery

1 unit including operator/chain hoist

Glazing and / or ventilation grille arrangement (optional)

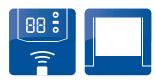

Notice:

- Glazing / ventilation arrangement is only possible starting at the 2nd section from the bottom.
- For technical reasons, the glazing / ventilation arrangement in the curtain is only possible starting at the 8th visible section from the top.

HORMANN

Including tubular drive

Product description and fitting dimensions

General rules

Roller garage door with tubular drive and emergency crank handle for private use With integral catch safety device and closing edge safety device as standard. Version as internal or external roller garage door, max. 10 door cycles per day according to warranty conditions.

- Wind load class 3 to LB 3000 mm (FS 75 without wind lock)
- Wind load classes with wind locks (FS 105 from LB 3001 mm):
 - LB 3000 mm to 4000 mm = wind load class 4
 - LB 4000 mm to 4500 mm = wind load class 3
 - LB 4500 mm to 5000 mm = wind load class 2

Frame

- Aluminium extrusion profile side guides with integrated strip brush profile and brush profile. Coating in door curtain colour.
- Lintel cladding made of sheet steel in door curtain colour.
- Curtain cover made of sheet steel, coated in door curtain colour.
- Side cladding of internal roller garage doors made of sheet steel, coated in door curtain colour.
- Side cladding of external roller garage doors made of aluminium, coated in door curtain colour.
- Side guides, lintel and curtain cover coated in basic colour of the timber finish in Decopaint/Decograin version.

Door curtain

Rolled aluminium profile foamed with polyurethane rigid foam with plastic runners, 77 mm section height without ribbing in the profile. Coloured versions with two-layer coil coating with a paint system based on a high-quality polyurethane coated with polyamide.

Note:

All Hörmann roller garage doors correspond to their technical properties and use state-of-the-art paint systems. Pressure marks and abrasive wear are design-related and cannot be avoided. They do not impair the function and durability of the roller garage door.

Surface coating

Version in standard colours

Interior and exterior of door curtain:Standard colours based on the RAL colour chart:

RAL 9016 Traffic white **BAL 7016** Anthracite grey RAL 1015 Light ivory RAL 7035 Liaht arev RAL 3003 Ruby red RAL 8028 Terra brown RAL 3004 Purple red RAL 9001 Cream RAL 5011 Steel blue **BAL 9005** Jet black RAL 6005 Moss green RAL 9006 White aluminium* RAL 7015 Slate grey RAL 9007 Grey aluminium 3

- Chartwell Green
- Noir 2100 Sablé (Anthracite metallic) at a surcharge

Note

Dark colours should not be used for doors that are exposed to the sun.

* IMPORTANT:

Despite the use of state-of-the-art colour coating systems, we cannot rule out colour deviations, specifically in metallic colours such as RAL 9006 or 9007.

Decopaint version with paint in timber design look

Door curtain with paint on the outside and timber design look on the inside Curtain cover in the basic colour of the Decopaint coating:

- Golden Oak medium brown, yellow-gold surface with vibrant oak character
- Rosewood reddish-brown stripey timber design

Decograin version with plastic film coating with timber design (not available for external roller garage doors)

Door curtain, exterior:

- Coated with UV-resistant synthetic film with timber design with embossed grain for an authentic timber character.
 - Golden Oak medium brown, yellow-gold surface with vibrant oak character
 - Rosewood reddish-brown stripey timber design

Door curtain, interior:

• Terra brown coating based on RAL 8028

Operator data and control electronics

- Tubular drive with emergency hand chain drive and crank handle drive for operation in case of power failure
 - Tubular drive technology with mechanically adjustable end-of-travel position (standard)
- Tubular drives with electronically adjustable end-of-travel positions (optional)
- Door cycles (Open/Close)
 - max. 10 per day/max. 3 per hour
 - On-time of tubular drive max. 4 min. per hour
- Operator possible with impulse operation on left or right side (querying of the door position not possible)
- Control housing with integrated LED light
- Operation with 2 push buttons on the control housing
- Operation via hand transmitter 433 MHz rolling code with 2 x hand transmitter RSC 2 (standard).
- 868 MHz BiSecur with 2 × hand transmitter HSE 4 BS (optional)
- Optical closing edge safety device installed at the factory in the bottom profile ensures safety as per DIN EN 13241-1
 - Closing edge safety device with spiral cable (standard)
 - Radio closing edge safety device (optional, receiver integrated in control housing)
- Adjustable reversing procedure
- Adjustable pre-warning phase
- Connection of external illumination possible
- Adjustable automatic timer
- Connecting option for one-way photocell EL 31

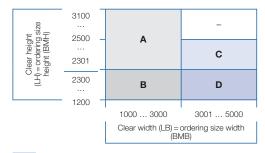

Standard equipment

- Door including tubular drive, emergency hand chain drive and complete curtain cover as standard.
- Control with 2 control buttons in the cover and integrated radio receiver 433 MHz rolling code
- 2 × Hörmann RSC 2 hand transmitter
- · Connecting lead with plug
- Optical closing edge safety device (with spiral cable) with photocell in bottom profile
- External roller garage door with emergency release lock

Delivery

2-part packaging incl. operator

Including side operator ProMatic

Product description

General rules

Spring-compensated garage horizontal door for private use. As standard, when the Hörmann operator ProMatic is used – max. 10 door cycles per day according to the warranty conditions.

Frame

 Vertical side guides made of aluminium extrusion profiles with integrated brush seal, coated in door curtain colour. Horizontal guide rails and fascia panel made of aluminium extrusion profile, coated in the door curtain colour Decopaint / Decograin version – colours matching the Decopaint / Decograin surface finish.

Door curtain

- Rolled aluminium profile foamed with polyurethane rigid foam with rollers, profile height 77 mm. Coloured versions with two-layer coil coating with a paint system based on a high-quality polyurethane coated with polyamide.
- Bottom profile with bottom seal.

Note

All Hörmann roller garage doors correspond to their technical properties and use state-of-the-art paint systems. Pressure marks and abrasive wear are design-related and cannot be avoided. They do not impair the function and durability of the roller garage door.

Surface coating

Version in standard colours

Interior and exterior of door curtain:

· Standard colours based on the RAL colour chart:

RAL 9016	Traffic white	RAL 7016	Anthracite grey
RAL 1015	Light ivory	RAL 7035	Light grey
RAL 3003	Ruby red	RAL 8028	Terra brown
RAL 3004	Purple red	RAL 9001	Cream
RAL 5011	Steel blue	RAL 9005	Jet black
RAL 6005	Moss green	RAL 9006	White aluminium
RAL 7015	Slate grev	RAL 9007	Grey aluminium *

- Chartwell Green
- Noir 2100 Sablé (Anthracite metallic) at a surcharge

Note

Dark colours should not be used for doors that are exposed to the sun.

* IMPORTANT:

Despite the use of state-of-the-art colour coating systems, we cannot rule out colour deviations, specifically in metallic colours such as RAL 9006 or 9007.

Decopaint version with paint in timber design look

Interior and exterior of door curtain:

- Golden Oak medium brown, yellow-gold surface with vibrant oak character
- Rosewood reddish-brown stripey timber design

Decograin version with plastic film coating with timber design

Door curtain, exterior:

- Coated with UV-resistant synthetic film with timber design with embossed grain for an authentic timber character.
 - Golden Oak medium brown, yellow-gold surface with vibrant oak character
 - Rosewood reddish-brown stripey timber design

Door curtain, interior:

Terra brown coating based on RAL 8028

Counterbalance

Tension spring system with lateral integral multiple tension spring assemblies. Transmission of forces via a cable, including cable guide and safety catch.

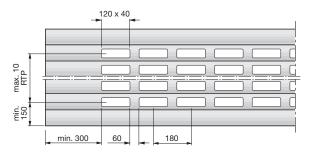

Closing devices

Locking with garage door operator.

Delivery

1 unit including operator

Glazing and / or ventilation grille arrangement (optional equipment)

Note:

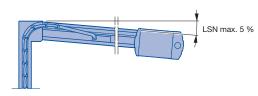

AUSS

вмн

Glazing / ventilation grille arrangement is only possible starting at the 2nd section from the bottom.

Operator (side operator)

- · As standard with garage door operator ProMatic
- Optionally with garage door operator SupraMatic E for a surcharge.
- Operator possible on the left or right, please state on order!

Warranty

Hörmann products are manufactured to the highest quality standards and leave our factory only after rigorous quality testing. However, if you should have grounds for complaint, this section tells you what our door warranty offers, and how to go about making your claim.

In the unlikely event of a warranty claim becoming necessary, please contact the dealer or distributor who originally supplied your garage door. Your dealer should then supply details of the claim, together with a copy of the warranty card provided with the door and proof of purchase to the Product Services Department at Hörmann (UK) Ltd. To enable your claim under warranty to be processed as quickly as possible, you should provide the following details:

- Your name, address and telephone number
- 2. Original invoice with date of purchase
- 3. Product description/door type and product number
- 4. Description of defect

An assessment of the claim will then be made. This may require Hörmann to inspect the product in-situ. In the event that there is no legitimate warranty claim under the terms specified herein, you may be liable for the costs of the inspection visit. We strongly recommend that you take note of the care and usage instructions displayed on the stickers on the back of your garage door, and on the page opposite, and that you follow these instructions throughout.

Hörmann installers

Hörmann (UK) Ltd has a nationwide network of recommended installers who will be able to offer you a regular maintenance service on your garage door. Please call us on 01530 513050 for details of your nearest dealer.

The Quality Check

A new garage door can be a significant investment that will transform the appearance of your home. This information is a guide to the quality you can expect.

Hörmann (UK) Ltd Garage Door Warranty

Warranty Period

The purchaser is granted a warranty covering the safe and reliable function of the Hörmann garage door for a period of 10 years from the date of purchase. A 5 year warranty applies to springs, wire cables, track rollers, hinges and guide rollers. The warranty period for replacement parts is 6 months or to the end of the current warranty period, whichever is longer. In the case of foil-coated timber-effect, a warranty of 5 years is granted, for timber a warranty of 2 years is granted on the door panels alone under the terms and conditions specified herein. The door mechanism and steel frame (if applicable) is covered by the 10 year warranty period.

Requirements

Warranty claims are only applicable in the country where the garage door was purchased. The product must have been purchased through our authorised distribution channels. The warranty only covers damage to the contract object. The fully completed warranty card together with the receipt of purchase correspondingly dated substantiates your right to claim under the warranty

Performance

During the warranty period we undertake to rectify any and all defects to the Hörmann product which can be proved to be attributed to a material or manufacturing fault. We pledge at our discretion either to exchange the defective merchandise for faultless merchandise, repair it or allow a reduction in price. We do not accept costs for dismantling and installation nor for carriage. Replaced parts become our property.

The warranty does not cover damage caused through:

- normal wear and tear
- improper installation
- negligent care and maintenance
- improper initial and subsequent operation
- negligent or wanton destruction
 external influences such as fire, water, salts, alkaline solutions, acids, abnormal environmental influences
- mechanical damage through improper transport and fitting
 priming and other surface protection treatments
- incorrect or too late applied surface protection treatments
- repair by non-qualified persons
- using non-Hörmann parts without the approval of the manufacturer
- removal of the product number or making it unidentifiable

Electric Operator Warranty

A separate 5 year warranty is granted on our electric operators. This includes operator mechanics, motor and motor control systems. A 2 year warranty is granted on radio equipment, accessories and system controls. There is no warranty on consumables (e.g. fuses, batteries, bulbs etc.). For further details please contact us on 01530 513030 or through our website on www.hormann.co.uk

User Information/Care

Finish - Steel Doors

The coating process applied to the door and chassis is environmentally friendly. Minor scratches or marks are not covered under the conditions of our warranty and should be repaired immediately to prevent corrosion and deterioration of the panel. Corrosive substances such as acids, alkalines, and salts, etc. should be cleaned from the door immediately; failure to do so will result in deterioration of the finish, which will not be covered under our warranty. Should deterioration of the finish start to occur you will need to repaint your door immediately. Prepare the surface lightly with wet and dry. Then tréat with solvent based 2 pack epoxy wash primer and a normal commercial paint (cellulose paint must not be used). Hörmann steel doors are a finished product. They do not require re-painting on site. They are however not immune to damage, which can occur at any stage of the handling of the product from factory to site.

Finish - Timber Doors

Timber panels are coated with a neutralising base-stain. Doors must be stored upright, under cover, with wrapping intact, until wrapping is removed. As soon as the door is unwrapped, one coat of a good quality basecoat primer must be applied to both sides of the door. Immediately after installation, your timber doors require a further two coats of a good quality exterior wood finish on both sides. Initial application and periodic treatment should be carried out strictly in accordance with the woodstain manufacturer's instructions. Failure to follow these instructions will result in early deterioration of the timber panel

Paint Finish - Steel Doors

Minor surface damage can easily be repaired using touch up sprays or sticks without invalidating warranties

Extracts from DHF consumer advice

The following document was designed by the Association of Garage Door Specialists, updated by the DHF and endorsed by all major UK garage door manufacturers, as a guide for purchasers of domestic garage doors.

Visual appearance of Garage Doors

A new garage door can be a significant investment that will transform the appearance of your home. This information is a guide to the quality you can expect.

The Quality Check

The quality check should be carried out in natural daylight, not direct sunlight. Stand at a distance of 3 metres from the door to view the overall appearance. The door is acceptable if, taking into account the facts below, none of the following are readily visible on the face of the door:

- Marks or distortion associated with the manufacturing process
- Minor indentations, marks or scuffs on the surface
- · Paint or stain blemishes

The Facts

I Doors	

Panel Distortion

The rolling or pressing of steel panels during manufacture will cause distortion in the steel and while every effort is made to keep this to a minimum, inevitably some visible distortion will remain. The application of high gloss paints will make this slight distortion more apparent, especially under certain lighting conditions, such as car headlamps, or bright sunshine.

Paint Finish

Primed doors – the primer coating is applied as a base coat only and as such requires additional finishing with a good quality exterior paint. Any marks or scratches on the primer coat should be rubbed down and repainted as part of this finishing process.

Timber Doors

Finished doors – the factory application of the paint finish is an automated process and this may result in minor blemishes or slight inconsistencies in the paint, particularly in the area of panel joints.

Timber

Timber is a natural product and there will be variations in pattern, colour, shading and grains. No two doors will be the same, because wood naturally expands and contracts according to environmental conditions, joints will open and close and some minor curvature may occur.

It is vital that timber doors are fully finished as per the manufacturers instructions before exposure to the elements.

All Doors

Colour Match

Pairs of doors should be ordered together to obtain the best colour match, bearing in mind the limitations of the materials used in the construction. Timber garage doors cannot be ordered as matching sets.

Size Variation

As the size of a door changes in height and/or width, the panel frequency and profile can change, therefore doors of the same style but of different sizes can be significantly different in appearance.

Clearances

All doors require operating clearances, i.e. the gap between the door panel and the frame opening, these are inbuilt during manufacture and should not be reduced by means of infills, or draughtproofing.

Deflection

When in the open position, all doors will display a level of vertical deflection or "sag" across the width of the panel. Individual manufacturers' specifications should be consulted for exact tolerances.

Power Operated Garage Doors

It is against the law to install a power operated garage door in the UK without complying with the Machinery Directive.

To comply with the Machinery Directive both the door and the operator used in the installation must have a Declaration of Incorporation from the manufacturer.

On completion of the installation the installer must provide a Declaration of Conformity and apply a CE mark giving details of the installation to the door/operator combination, which is now classed as a machine.

The installer must issue to the customer a Declaration of Conformity on completion of the installation.

The installer must hold copies of both the Declaration of Incorporation and the Declaration of Conformity on a technical file for inspection by the relevant authorities.

If any of the above requirements are not fulfilled the installation is illegal.

Please ensure for your own safety and peace of mind that whoever installs your electric operator is both willing and able to fulfil these requirements; if they are not – do not use them!

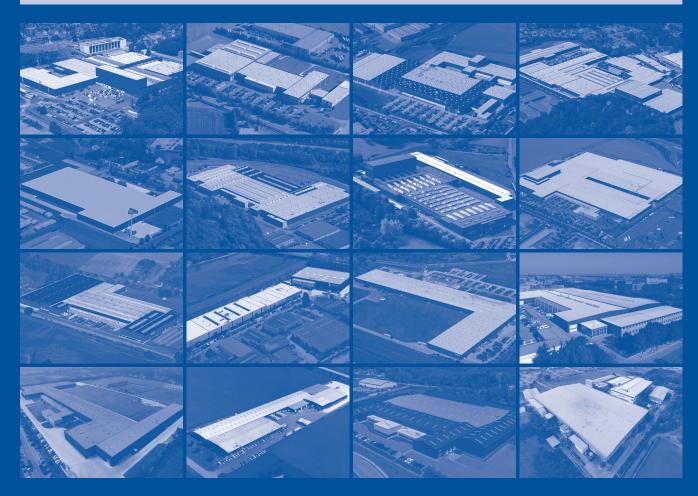

Members of the DHF Garage Door Installer Group can and will install your Hörmann operator safely and legally.

Since the company's policy is one of continuous improvement of its products, we reserve the right to make any alterations in design, manufacture or price.
